ECIA E I

2.

Suppose that we have the following probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Number of children	Probability
0	0.10
1	0.20
2	0.30
3	0.20
4	0.10

Find the probability that a woman has at least 2 children.

B J C E C., A J

Answer: 0.60
12 June 2021

The following table shows the probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Find

1.

Suppose that we have the following probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Number of children	Probability
0	0.10
1	0.20
2	0.30
3	0.20
4	0.10

Find the probability that a woman has at least 2 children.
2.

Suppose that we have the following probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Number of children	Probability
0	0.10
1	0.20
2	0.30
3	0.20
4	0.10

Find the probability that a woman has at least 2 children.
3.

Suppose that we have the following probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Number of children	Probability
0	0.10
1	0.20
2	0.30
3	0.20
4	0.10

Find the probability that a woman has at least 2 children.
4.

Suppose that we have the following probability distribution for the number of children born to a woman (the number of children born to a woman is a discrete random variable):

Number of children	Probability
0	0.10
1	0.20
2	0.30
3	0.20
4	0.10

Find the probability that a woman has at least 2 children.
